About Daystar

Daystar Products International was founded in 1977 and is headquartered in Phoenix Arizona. We are an industry-leading manufacturer of performance, aftermarket lift kits, leveling kits, and other accessories for on- and off-road trucks, Jeeps, and UTVs. Daystar's reputation in the off-road community has been built by 40 years of manufacturing quality, American-made products, combined with the eagerness to evolve with the times.

At Daystar we design, engineer, and manufacture products that exceed customer expectations. We do this all in-house and, as off-road enthusiasts and racers ourselves, we take great pride in the products we produce.

Comfort Ride Leveling Kits

Ford • Chevy/GMC • Dodge/RAM • Jeep • Toyota • Nissan

Daystar's Leveling Kits are uniquely designed for your vehicle's make and model. Our leveling kits raise the front end of your vehicle to match the back allowing for more clearance and larger, aftermarket wheels and tires.

Daystar's Leveling Kits are specifically designed to work in tandem with the stock suspension components on your vehicle giving our leveling kits an economic incentive to those wanting to level their ride.

Our leveling kits use premium, high-density, progressive-rate polyurethane strut and coil spring spacers that provide moderate amounts of lift without sacrificing the factory comfortable ride you expect. Daystar prides itself on our product quality, craftsmanship, and ease-of-use, which is why we incorporate all parts necessary for a proper installation that will stand the test of time and work flawlessly with your stock or aftermarket parts.

- Easy installation, no special tools required, with no strut disassembly required
- Made of high-quality, progressive-rate polyurethane
- No metal-on-metal contact
- Maintains a factory ride
- Limited Lifetime Go EVERYWHERE Warranty

Comfort Ride Lift Kits

Ford • Chevy/GMC • Dodge/RAM • Jeep • Toyota • Nissan • Subaru

Daystar's Comfort Ride Lift Kits are Driven by Design and engineered to work with stock suspension components to keep costs down while keeping quality high

Daystar's premium, high-density, progressive-rate, polyurethane strut and coil spring spacers act as isolators to combine moderate amounts of lift while maintaining the factory smooth ride you expect.

The majority of vehicles will require no cutting, welding, or chassis alterations. Your vehicle will maintain the factory ride quality, stability controls, and towing capacity. In the case of torsion bar applications, re-indexed torsion keys allow you to dial-in the desired amount of lift to accommodate plus-size tire and wheel packages.

Daystar's lift kits are FMVSS126 compliant and come with our Limited Lifetime Go EVERYWHERE Warranty.

- Easiest way to run larger tires
- Upper coil and strut spacers maintain the factory smooth ride
- Made of high-quality, progressive-rate polyurethane
- No strut disassembly required
- No metal on metal contact
- FMVSS126 compliant

Tactical Lift Kits

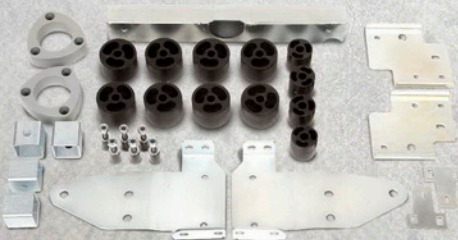

Ford • Chevy/GMC • Dodge/RAM • Toyota

Daystar's Tactical Lift Kits have been engineered for one purpose: Clear larger tires. And it's done without the need for heavy equipment or special tools to install.

Daystar's 4.0 Series Tactical Lift Kits offer 4" of lift designed by enthusiast engineers for consumers who want just enough lift to clear 33" to 35" tires, depending on the vehicle, while retaining the stock wheels.

Installation requires no welding or chassis alterations offering no metal-on-metal contact. Your vehicle will maintain the factory ride quality, stability controls, and towing capacity while being FMVSS126 compliant and carrying Daystar's Limited Lifetime Go EVERYWHERE Warranty

- Kit includes Kevlar®-infused polyurethane components giving your ride a stronger, lighter, and weather-proof material for off-road environments
- Run larger tires on stock or aftermarket wheels for more ground clearance
- No welding, no chassis alterations, no metal-on-metal contact
- Maintains factory ride quality, stability controls, and towing capacity
- FMVSS126 compliant

MCE Fenders by Daystar

JEEP Wrangler JK, TJ/LJ, and YJ

MCE Fenders by Daystar are made for Jeep Wrangler JK, TJ/LJ, YJ, and mimic the true flatty, aggressive-looking fender of the original Jeeps.

Our JK fenders provide 2" of extra tire clearance allowing up to a 35" tire to be installed with no suspension lift. The MCE-Spec TPO plastic will not sag or crack, is UV-stable, and flexible enough to absorb impacts on the trail and save your Jeep's body.

Our material is so strong our fenders have a lifetime warranty against cracking and their performance is not affected by cold weather or off-road use.

- MCE-Spec TPO is flexible, UV-stable, paintable, and the most durable on the market
- Available in several widths to choose your level of aggressive look
- Easy 2-3 hour install for a set of 4 JK fenders, 4-5 hours for a TJ/LJ or YJ
- Extra clearance for larger tires
- Made in the USA with a lifetime warranty

Body Bushing Mounts

Ford • Chevy/GMC • Jeep • Toyota

Daystar body mounts are a more durable replacement for worn factory body mounts. They offer less friction and are noise free for a quiet, smooth ride.

Daystar's body bushing mounts are precision-engineered as a direct replacement for worn or failed factory mounts. They are manufactured from a premium polyurethane blend that insulates the cab while being far more durable than stock mounts.

Select body bushing mounts are available as polyurethane bushings only or with replacement steel sleeves and high-strength fasteners.

- Made from a high-quality, durable polyurethane
- Vehicle fluid and road grime resistant
- Lasts up to 3 times longer than stock bushings
- Improves handling and performance
- Replaces worn or failed factory body mounts

Latest Sponsorship

As off-road enthusiasts, we enjoy and have proudly sponsored drivers across many off-road racing platforms. Beginning in the 1980's, we had the pleasure to sponsor Marty Moates who went on to win the 1980 Caribead U.S. Grand Prix. Throughout the decades, Daystar has sponsored Doug Goodman and Chris Goodman who performed exceptionally over a 15 year period in MX. In the late 2000's Mark Turner joined forces with Daystar and sparked an incredible

decade of hair-raising achievements on the UTV track. Daystar has kept our racing heritage alive by sponsoring exceptional talent in the racing community. For that reason, we are excited to announce Daystar's first ever Ultra4 sponsorship with none other than John Grounds of Proving Grounds Racing. Check out John's impressive stats below and stay in touch via Facebook for the latest coverage of racing events.
