UNIVERSAL AIR BAG CRADLE

Keep the benefits of air bags, while
maintaining suspension travel!

KU09140BK

We want our trucks to do everything. Adding an air bag system has always meant sacrificing something. Most often that will be some suspension travel. Your air bag system should compliment your truck, not inhibit its ability. Daystar's new Air Bag Cradle mounts to your trucks lower suspension providing more room for the air bag to safely cycle with no loss of overall wheel travel. The Air Bag Cradle fits most full-size pick up trucks, and SUVs running 6" diameter, bellow-style air bags

DAYSTAR COOLS THE HEAT!

Daystar once again solves a common problem with a new product. JK owners have always suffered from Under Hood Heat. Our new fully functional Hood Cowl will keep your engine cool & maintain the factory under hood insulation.

- You no longer have to replace the entire hood to reduce heat.
- Industry's first fully-functioning Hood Cowl channels air for truly functional air directional chambers.
- Easy to install.

Maintains the factory under hood insulation.
