LED LIGHT BARS

NEW**LED LIGHTS****See what you're missing.**

Work or play, road or trail—you'll ride safer at night and in other low visibility situations with brilliant LED Light Kits from QuadBoss. With high-intensity Cree® LEDs, these lights provide you with better visibility and reduced eye fatigue at very little electrical draw. The combination of wide flood and narrow spot beams provides maximum spread and throw, making it easier to see wildlife and other hazards on the trail.

QuadBoss light kits aren't afraid of hard work or hard play. Abrasion, shatter and weather-resistant, they can take just about anything you have to give. Damage to part of the light will only cause LEDs in that section to fail—the rest just keep on lighting your way. They easily mount to a wide range of vehicles—ATVs, UTVs, even trucks and SUVs. And, with no bulbs to burn out and no glass lens to break, your quad might just wear out before these lights do!

- 30,000-hour life expectancy
- 94% efficient—more light, less power
- Abrasion and shatter resistant
- Heavy-duty aluminum housing
- 100% waterproof enclosure
- Works with 11-24V DC applications
- One-year manufacturer's warranty

LIFT KITS

One of the most common reasons people buy a clutch kit is because they have added larger, more aggressive tires to their machine. The clutch kit recalibrates your CVT so you can effectively turn those larger tires. If you add larger tires you'll also need a lift kit to provide the necessary clearance.

- Improve your ground clearance
- Lift kits can gain two to four inches of additional clearance
- Made in USA

Note: Kit contents vary by model.

KAWASAKI BRUTE FORCE A-ARM UPGRADE KIT

The O.E.M. design uses two spherical bearings to carry the thrust load of the entire front end. Over time, bearings begin to wear and the external seals become ineffective due to excess play, which allows water and debris to enter the assembly.

- Contains all the parts needed to upgrade all four A-arms
- Includes 12 machined acetal shoulder bushings and hardened steel pins to carry the load, greatly extending the life of the A-arm assembly

BALL JOINT KITS

Put an end to premature Honda ball joint failure by upgrading from the O.E.M. aluminum joint to our heavy-duty steel joint. We also offer replacement ball joints for those Kawasaki and Suzuki applications that force you to buy an expensive A-arm or steering knuckle.

- Heavy-duty steel cases with a POM-M90 bearing cup isolate the ball end from the case for long life
- Ball joint kit is sold per A-arm and comes with snap ring and cotter pin
